

Ahmed Mohamed Helmy

Software Engineer | Front-End Developer (React.js)

📍 Riyadh, Saudi Arabia ✉ ahmedhelmy2722@gmail.com ☎ (+966) 0545178179

🌐 [ahmedhelm-y](#) 🐙 [ahmedhelm-y](#)

Summary

Motivated Software Engineer specializing in Front-End Development with a strong foundation in React.js, Redux, and TypeScript. Passionate to build scalable, high-performance web applications. Eager to join a dynamic engineering team immediately and contribute to developing innovative digital solutions.

Technical Skills

- **Languages:** JavaScript (ES6+), **TypeScript**, HTML5, CSS3.
- **Frameworks & Libraries:** **React.js**, **Redux Toolkit**, React Hooks, React Query, Tailwind CSS, Bootstrap 5.
- **Tools:** Git, GitHub, RESTful APIs, Postman, VS Code, Figma (to Code)
- **Concepts:** Responsive Design, State Management, SPA (Single Page Applications), Clean Code.

Projects

Fresh Cart E-commerce | *React.js, Redux Toolkit, RESTful APIs, Bootstrap:* [Live Demo](#) [GitHub Repo](#)

- Architected a scalable Single Page Application (SPA) that simulates a complete e-commerce flow (browsing, cart management, checkout).
- Implemented **Redux Toolkit** for efficient global state management to handle complex data flows between components.
- Integrated RESTful APIs using **Axios** to fetch dynamic products and manage user authentication (JWT).
- Optimized application performance and loading speed, ensuring a fully responsive design across mobile and desktop devices.

Product Management System (CRUDS) | *JavaScript (ES6+), DOM Manipulation:* [Live Demo](#) [GitHub Repo](#)

- Developed a high-performance data management system capable of handling complex operations (Create, Read, Update, Delete, Search) for large datasets.
- Built the core logic using **Vanilla JavaScript** to demonstrate strong understanding of algorithms and data structures without relying on libraries.
- Implemented real-time search functionality and data persistence using Local Storage to enhance user experience.

Professional Experience

Front-End Developer Jahmi Design Company Aug 2024 - Jan 2026

- Collaborated with UI/UX designers to translate complex Figma designs into high-quality, responsive web interfaces using **HTML5, CSS3, and JavaScript**.
- Optimized website performance and loading speeds, resulting in a significantly better user experience (UX) and higher conversion rates.
- Implemented custom Front-End logic and animations to enhance interactivity and ensure cross-browser compatibility across all devices.

Front-End Developer (Part-Time) Hasad Marketing Company Feb 2025 - Dec 2025

- Developed and customized user interface components to meet specific client requirements, ensuring pixel-perfect implementation.
- Applied advanced **JavaScript and CSS** techniques to modify layouts and improve the visual hierarchy of web pages.
- Maintained and debugged web applications, resolving UI issues to ensure seamless functionality and performance.

Education

Bachelor In Software Engineering (Suez Canal University – Faculty of Computer and Information Sciences)

Graduation Project: Integrated Gym Management System, Grade: Excellent

Sep 2020 – Oct 2025

Courses

- **Mastering Web Fundamentals – El-zero Web School:** Mastered core web technologies (HTML5, CSS3, JavaScript ES6+) with a deep focus on DOM manipulation, responsive design patterns, and advanced problem-solving techniques.
- **Front-End React.js Diploma – Route Academy:** Intensive training on building scalable Single Page Applications (SPA). Covered React Hooks, Routing, and global state management (Redux/Context), with hands-on experience in integrating RESTful APIs.
